CANTILEVER UMBRELLA RANGE

Flare Shade Cantilever Umbrellas are the perfect outdoor shade solution when you need to "move your shade." Cantilever umbrellas have a unique function that normal umbrellas lack. The cantilever umbrella is designed with a side-placed support frame which counter balances the canopy. The side mounted pole, which is fixed onto a bearing base plate, allows the canopy to swing fully through a 360 degree rotation.

The canopy can also be tilted at a range of angles. This technology allows you to adjust your shade in just about any way you desire. Cover yourself cooking at the barbecue for a while, then swing the canopy over, delivering cool shade where your guests are seated.

The Flare Shade cantilever umbrella has been engineered for strength and long term durability.

Printing

UV Printing

UV printing is a form of digital printing that uses ultra-violet lights to dry or cure ink as it is printed. As the printer distributes ink on the surface of the marquee fabric, specially designed UV lights follow close behind, "curing" or "drying" the ink instantly.

The benefits of UV printing are that it is very resistant to fading. With UV printing there is also no restrictions to the number of colours or logos on the design. UV printing is done on our heavy duty 900D PU Coated Polyester Fabric.

Screen Printing

Screen Printing is the process whereby ink is forced onto the fabric through a mesh screen. Screen printing is ideal for simple designs that are produced in higher quantities.
